Details

ARM is an organization based out of Tuskegee Alabama that assists those who live in poverty. They do home repair for people in the area that ranges from new roofs, drywall, flooring, plumbing, and much more. They partner with the University of Auburn and have engineering students intern and help teams with the repairs. They also host a free summer camp for underprivileged kids in the city that provides them a safe place to learn about Jesus and receive some much needed love!

We have the opportunity to help with both of these programs! There will be one day camp site and multiple construction sites depending on our number of youth! Students will be asked their preference but will be moved around as needed! As such I would suggest packing clothes for each program!

If there are any adults skilled with tools or construction projects that would like to volunteer please contact Robbie Amunds! (Licensed professional not required)
